

STAMPING
PRODUCTS

Manufacture with the Strength of Zinc

ARTAZN™ Stamped Product Applications

From large plumbing hardware to the smallest grommets and washers, zinc provides the ideal material for stamped products.

Zinc has several advantageous properties for stamping: formability, ductility, deep draw, high relief, corrosion resistance, and a wide range of finishing capabilities.

The features and benefits of zinc cost less than similar metals such as brass and stainless steel allowing large cost-savings for stamping manufacturers.

The ARTAZN™ development team can work with customers to develop new customized solutions to suit their needs.

Electrify with the Power of Zinc

ARTAZN™ Electrical Products Applications

Plumbing Hardware

- ◆ Reduced Tooling Wear, Durable Finish

Grommets and Washers

- ◆ Formability, Corrosion resistance, Durable Finish

Fasteners

- ◆ Formability, Corrosion Resistance, Durable Finish

Coin Blanks & Medals

- ◆ Formability, Ductility, Wide Range of Finish Options

Braille Plates

- ◆ Formability, Ductility, Durability

Battery Cans

- ◆ Deep Draw, Formability, Ductility
