

## STAMPING PRODUCTS

## Manufacture with the Strength of Zinc

### ARTAZN Stamped Product Applications

From large plumbing hardware to the smallest grommets and washers, zinc provides the ideal material for stamped products.

Reduce tooling wear costs with the formability, ductility, and deep draw of zinc.

Reduce replacement costs of low-quality products with zinc's high relief, corrosion resistance, and wide range of finishing capabilities.

Zinc costs less than similar metals such as brass and stainless steel allowing large cost-savings for stamping manufacturers.

The ARTAZN development team can work with customers to develop new customized solutions to suit their needs.
